DETAILED ACTION

Response to Preliminary Amendment

1. The preliminary amendment submitted on 29 April 2005 has been entered. Claims 11-13 have been added and accordingly claims 1-13 are currently pending.

Specification

2. The abstract of the disclosure is objected to because it is not found on a separate page free of extraneous material . Correction is required. See MPEP § 608.01(b).

Claim Objections

3. Claim 1 is objected to because of the following informalities: The claim has a period in the middle of it (i.e. after the phrase "formula (IV)) which is not proper. Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 it is unclear as to the amount of the pigment dispersing agent present in the pigment formulation.

In claim 2, part d), it is unclear as to what types of additives are encompassed by the phrase "at least one customary additive".

In claim 3 the phrase "the preparation process" lacks proper antecedent basis.

In claim 4 the phrase "added before or during synthesis" is vague and indefinite as claim 3 mentions nothing about synthesis.

In claim 5 the phrase "added before or during a fine division process" is vague and indefinite as claim 3 mentions nothing about a fine division process.

In claim 6 the phrase "added before, during or a after a solvent treatment" is vague and indefinite as claim 3 mentions nothing about a solvent treatment.

In claims 7 and 8 it is unclear as to whether or not the adding step is in addition to the adding step of claim 3 or if this refers to how it is added. Clarification is requested.

In claim 9 the phrase "high molecular weight organic material" is a relative phrase which renders the claim indefinite. The phrase "high molecular" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Claim 10 is vague and indefinite as it refers to formula (I) and formula (II) however no formula is recited in the claim. The phrase "high molecular weight organic material" is a relative phrase which renders the claim indefinite. The phrase "high molecular" is not defined by the claim, the specification does not provide a standard for

ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Information Disclosure Statement

6. The references have been considered by the examiner however they are not seen to teach and/or fairly suggest the instant invention.

Allowable Subject Matter

7. Claims 1-13 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

8. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record, which is the most pertinent art found, fails to teach and/or fairly suggest the instant invention comprising a at least one pigment having a specific formula in combination with at least one dispersing agent having a particular formula.
